ABOUT ME

Third-year Mathematics with Computer Science student with a strong interest in data analysis, database management, and software development. Experienced in working with SQL, databases, APIs, and data processing through academic projects. Skilled in developing applications and organizing data to solve problems and support practical solutions. Interested in continuously learning new technologies and applying technical and analytical skills to real-world projects.

EDUCATION

King Mongkut's University of Technology North Bangkok (KMUTNB)

Bangkok,Thailand

Bachelor of Science in Mathematics with Computer Science

Jul 2024-Present

PROJECTS

Government Data API Application

Object Oriented Programming Subject
February 2026

- Developed a Java desktop application that retrieves government data from data.go.th via REST API
- Implemented HTTP requests and JSON data processing to retrieve and transform API responses
- Designed a user interface with Java Swing for selecting data categories and displaying results in JTable
- Integrated multiple government datasets, including case statistics by month, case type, product type, and government agency
- Designed the application workflow using Data Flow Diagrams and Data Dictionary

Book Store System

Database Management Subject
March 2026

- Designed a database management system for a bookstore using Data Flow Diagrams and Entity Relationship Diagrams
- Created Data Flow Diagrams to represent system processes and data flow
- Designed Entity Relationship Diagrams to define database entities, attributes, and relationships
- Structured database information to support bookstore operations and management

Brick Zone System / Toy Store Management System

Database Programming Subject
March 2026

- Designed a database management system for a toy store using ER diagrams and relational database design
- Developed data dictionaries for products, customers, orders, payments, and other system entities
- Designed system functions including Admin/Staff/User login, product management, order processing, sales history, and member management
- Support sales and inventory operations.

Home Jersey

Database Management Subject
April 2026

- Developed a database management system for a football jersey store using Microsoft Access and SQL
- Designed and managed related tables for products, customers, orders, payments, shipping, reviews, and staff
- Created SQL queries to retrieve and organize data from the database
- Developed forms and navigation functions for managing and displaying system data
- Created reports to present database information in an organized format

SKILLS

Programming Languages

- Python,C,HTML/CSS,Javascript,SQL

Tool & PLatforms

- Git,SQL server,Microsoft Access,VS Code Studio,Figma
-
